

Simulocity Continues to Experience Rapid Worldwide Growth

Simulocity is experiencing continued growth across its multiple virtual platforms to clients around the world, with their immersive and innovative technologies.

Orlando, Florida, June 16, 2020 — Simulocity continues to show signs of rapid growth this year, with great success across all its award-winning platforms in global markets. Over the last 12 months, the firm's innovations took hold in nearly every continent, with clients in the USA, Brazil, UAE, Saudi Arabia, Qatar, Spain, Australia, and across Europe and Asia. Simulocity's innovative platforms have expanded, including SIM-EXPO, a virtual trade show and events platform, along with SIMCITA,

the platform that virtualizes any organization, including a virtual health suite. Those platforms have assisted organizations around the world by virtualizing conferences, resorts, training centers, hospitals and annual conventions that were previously cancelled amid the coronavirus pandemic. Simulocity

experienced exponential growth during the global COVID-19 pandemic, helping many global organizations virtualize their trade shows (year-round), infusing 24/7 exhibits, education sessions, new revenues streams, and help virtualize company operations and their workforces.

"Now we can infuse new, year-round revenue streams and increase access to clinicians, learners, exhibitors, and consumers with a myriad of services via our award-winning virtual platforms," said Dr. Manny Dominguez, Simulocity's founder and CEO.
