## Simulocity Awarded Technology Services Contract by The US Department of Agriculture (USDA)

Orlando, FL — Simulocity LLC, a leading provider of innovative technology solutions, has secured a significant contract with the U.S. Department of Agriculture (USDA) to provide support and maintenance services for critical digital resources.

USDA Food and Nutrition programs, in partnership with State and Tribal governments, serve an estimated one in four Americans annually. The agency is dedicated to ensuring access to healthy and safe food for program participants, including pregnant women, infants, and children in childcare and schools, and low-income families utilizing food banks, local farmers markets, and supermarkets.

Under this agreement, Simulocity will provide comprehensive support for USDA digital platform(s), enhancing their accessibility and functionality to further the shared mission of improving public health. Simulocity's contributions to development will raise the bar in the USDA's goal of providing access to food and dietary information across the United States and the globe.

Dr. Manny Dominguez, CEO of Simulocity, stated, "We're honored to be selected by the USDA for this crucial, 4-year technical project. Our team's expertise will ensure ongoing support for these essential nutritional resources via a myriad of technical solutions, including the development and support of mobile apps, web platforms, and cloud migration. We're excited to contribute to the USDA's mission of promoting health and nutrition for all Americans."

This contract highlights Simulocity's expanding presence in the government sector and reaffirms its commitment to delivering high-quality, secure, and scalable technology solutions.

## About USDA

The U.S. Department of Agriculture (USDA) is made up of 29 agencies and offices with nearly 100,000 employees who serve the American people at more than 4,500 locations across the country and abroad.

The USDA provides leadership on food, agriculture, natural resources, rural development, nutrition, and related issues based on public policy, the best available science, and effective management.

USDA has a vision to provide economic opportunity through innovation, helping rural America to thrive; to promote agriculture production that better nourishes Americans while also helping feed others throughout the world; and to preserve our Nation's natural resources through conservation, restored forests, improved watersheds, and healthy private working lands.
